# Subject Index

A

**Acoustic emission behavior**, epoxies, during tensile loading, 513
**Adhesive bonding**, polymer composites, 1325
**Aging**
dynamic mechanical and transient properties and, PEEK, 1273
gas permeability properties and, poly[1-(trimethylsilyl)propyne], 44
polymers, modulus profiling data, 29
poly(methyl methacrylate)/poly(styrene-co-acrylonitrile) blends, 1604
tensile stress relaxation and creep, cured EPON 828/epoxy adhesives, 662
thermo-oxidative, primary lightguide coating, 1177
**Aliphatic diazoketones**, resists prepared with, positive excimer laser, 863
**Amorphous phase**, behavior of linear polyesters in, 55
**Antioxidants**, diffusion, crosslinked polyethylene, 77
**Automobile bumpers**, plastic, hot gas welding and, 1368

B

**Banbury mixer**
hydrodynamic analysis, 701, 1059
**Benzophenone group**, photosensitive polyimides containing, photocure of, 942
**Biaxial stretching**
poly(ethylene terephthalate) films, optical properties of, 1534
polystyrene film, 1516, 1524
poly(vinyl chloride)/poly(methyl methacrylate co imide) blend film, 1528
ultrahigh molecular weight polyethylene gel films, 383
**Biopolymer extrusion**, theoretical and experimental study, 433
**Bisbenzocyclobutene**, thermoset matrix host, rigid-rod molecular composities, 107
**Bisphenol-a-polycarbonate**
studies, blends of poly(ethylene terephthalate), 1766
ternary blends of, chemistry of, 359
**Butt fusion**
aligned and misaligned, failures in, 1396
axial misalignment, strength of polyethylene pipe and, 1406
bond strength, joining of polyethylene pipe, 1387
vibration welds, impact strength of, 1677

C

**Carboxylic acids**, unsaturated, grafting to ethylene polymers, 1579
**Cellulose nitrate**, constitutive equation, time-dependent properties and, 1588
**Chemorheology**
thermosets, model for epoxy-based composites, 973
thermosetting resins, modeling during processing, 1279
**Chinese rosin**, contrast enhanced lithography and, 902
**Coat-hanger die**, dual-cavity, design and analysis of, 1066
**Coatings**
fiber/cable performance and, 1159
optical fiber, 1172
low microbending sensitivity, 1172
polyamic acid, solvent removal in, 1611
primary lightguide, thermo-oxidative aging in, 1177
UV curable, thermomechanical properties of, cure temperature effects, 1165
**Cold compaction**
PEEK, 1446, 1456
sintering and, ultrahigh-molecular-weight polyethylene, 564
**Composites**, glass fibers in, surface treatments for, 543
**Compression molds**, optimum heating system design for, 1027
**Condensing heat exchangers**, polymeric materials for, 1111
**Contrast enhancing materials**
lithography process, Chinese Rosin as a binder in, 902
water soluble, 898
**Copolyester**
1,4-cyclohexanedimethanol-based, hydrolysis of, 1103
liquid crystalline, polycarbonate and, physical properties of blends, 244
polyarylate blends, as-molded and annealed blends, phase morphology, 1493
**Copolymers**
block, microstructural diagnosis, 227, 235
nylon-6 block, crystallization of, 493
thermotropic rigid-chain, thermal behavior and kinetics of crystallization, 1089
**Crack**
growth mechanisms, multiphase polymers, 1142
initiation, failures in pipe butt fusion joints, 1396
**Craze**
calculated stress field around, 426
dissemination, during fatigue fracture, polystyrene, 1592
**Creep**, uniaxial behavior, processing effects, linear low-density polyethylene, 1598
**Cross-linking**, suspension, microspheres and microcapsules studied by, 1746
**Crystalline phase**, behavior of linear polyesters in, 55
**Crystallization**
kinetics of, thermotropic rigid-chain copolymer, 1089
nonisothermal, PEEK, 801
nylon 6 block copolymers, 493
oriented polymers, 1147
poly(ethylene terephthalate), 1259
sol-gel transition and, polyethylene/decalin solution, 1569
thermal interactions, oriented polymeric materials, 1503
**Curing**
analysis of sheet molding compounds, models with substructures, 740
composite thermoset reaction, kinetic studies, 302
constitutive relationships and, polyester mortar, 1628
dielectric models, epoxy/amine systems, 339
dynamics, sheet molding compound paste, 1286
epoxy-anhydride resin, 1553
epoxy resin, viscosity modeling during, 329
isothermal and nonisothermal, dielectric response of thermosets during, 315
measurement of dielectric loss and viscosity during, thermosetting polymers, 278
monitoring in sheet molding compound processing, 308
monitoring processing properties, unsaturated polyesters, 989
monitoring viscosity during, frequency dependence of the impedance to, 285
monitoring with microdielectrometry, composite matrix resin, 290
nonisothermal differential scanning calorimetry, unsaturated polyester system, 1097
polyimides, 347
state during non-isothermal cure, dielectric determination, 334
temperature, thermomechanical properties of UV curable coatings and, 1165
thermal and chemorheological behavior, thermosets, 973
**1,4-Cyclohexanedimethanol**, copolyester based on, hydrolysis of, 1103

D

**Deformation**
history, effects on polycarbonate and thermotropic liquid crystalline polymer blends, 573
oscillatory, polymeric solids under, ultrasonic velocity and attenuation, 1125

**Devolatilization**
bubble growth controlled, twin-screw extruders, 178
polymer melt, fundamental study of, 782
**Diazides, naphthoquinone**, dissolution inhibition mechanisms, 916
**Dielectric response**
measurement of, thermosetting polymers, 278
non-isothermal cure, cure state during, 334
thermosets, isothermal and nonisothermal cure, 315
thermosetting epoxy/amine systems, cure of, 325, 339
**Dye**
organic, sensitization of photoreactive polyimide precursors, 945
photobleachable, 898

E

**Electron beam resist**
bilevel lithographic process using, 920
polymers as, 353
**Electrophilic aromatic substitution**, novel photoresist design based on, 960
**Elongational flow field**, purely elastic particles in, deformation of, 593
**Epoxy/amine systems**, thermosetting, dielectric analysis of cure of, 325, 339
**Epoxy resins**
acoustic emission behavior, during tensile loading, 513
advancement of reaction, viscoelastic modulus with, 531
amine-cured, network mechanical properties, 806
anhydride, monitoring the cure of, 1553
composite matrix, monitoring cure with microelectrometry, 290
cure, viscosity modeling during, 329
deep UV lithography, 907
different loading rates, plane-strain fracture toughness, 523
reaction injection molding process of, vitrification effect during, 456
rubber-toughened
fatigue crack propagation, 1477
structure-property relations, 1466
**Etching rates**, factors controlling, multilevel lithography, 874
**Excimer laser**
resists
deep UV lithography, 859
negative, 868
prepared with aliphatic diazoketones, 863
**Extrudates**
polymeric
melt transformation coextrusion enhancement of, 1004, 1010
morphological and mechanical property studies, rotational extrusion process, 1511
**Extrudate swell**
die wall cooling or heating effects, 685
modeling the film blowing process and, 722
**Extruders**
residence time distribution experiments, development of an ionomer tracer for, 134
screw, flow in, between parallel plates, 471
twin-screw
bubble growth controlled devolatilization in, 178
counter-rotating, non-intermeshing, modeling of, 709
distributive mixing in, 1018
self-wiping, pumping characteristics of, 433
**Extrusion**
biopolymer, theoretical and experimental study, 433
line variations, statistical procedure to identify, 1618
plastic sheets
molecular orientation and internal stresses, 163
stress development in, 731
reactive, polypropylene degradation during, 993
screw speed and size in, dependence of melt temperature on, 415
single-screw, melting mechanism, 258
welding process, 1376

F

**Fastening**, mechanical, polymer composites, 1332
**Fatigue**, crack propagation, rubber-toughened epoxies, 1477
**Fillers**, particulate, monitoring quality of mix, polymer melts, 1759
**Film blowing process**, modeling of, extrudate swell effects, 722
**Fluid dynamics analysis package**, analysis of Banbury mixer, 701
**Fluoroelastomer-diluent system**, glass transition temperature of, 366
**Fracture**
fatigue, craze dissemination, polystyrene, 1592
high-speed mechanics, photography of polypropylene, 1077
impact energy, mineral-filled polypropylene, 505
oriented PEEK, 405
plane-strain, epoxies at different loading rates, 523
toughness, multiphase polymers, 1142
**Frequency dependence electromagnetic sensors**, viscosity monitoring, during cure, 285

G

**Gas permeability properties**, poly[1-(trimethylsilyl)propyne], aging effects, 44
**Gas transport**, multilayer packaging structures, 639
**Glass fibers**, surface treatments for, composite materials, 543
**Glass transition temperature**, fluoroelastomer-diluent system, 366
**Gradient-index plastic**, optical devices and, 1200

H

**Halatopolymers**, complex formation, polyketone and, 777
**Heating system**, optimum design, compression molds, 1027
**Hot drawing**, effects on thermotropic polymer fibers, 153

I

**Impulse Viscoelasticity**, amine-cured epoxies, 806
**Injection molding**
amorphous engineering plastics, microstructure and ultimate properties, 1298
elongational flow polyethylene, properties of, 186, 193
filling process, melt solidification, 1039
melt homogeneity in, ring-bar device and, 202
molded parts, reducing residual stress in, 441
nylon 6, knit line structures in, 209
polymer melts in the heating barrel during, temperature measurements of, 171
polypropylene discs, layered structure of, 835
reaction, epoxy resin, vitrification effect during, 456
screw design, 479
**Insulation**, high voltage cable, crosslinked polyethylene, 13
**Intermolecular interactions**, miscible polymer blends, 609
**Ionomer tracer**, development of, extruder residence time distribution experiments, 134
**4,4′-Isophthaloyldiphthalic anhydride**, polymides, 63

J

**J-integral**, impact-modified polymers based on, fracture toughness of, 671
**Joining**
biaxially oriented polyethylene pipes, 1638
plastics and plastic composites, 1310
polyethylene pipe, dependence of butt fusion bond strength, 1387

K

**Knit line structure**, nylon 6, injection molding of, 209

L

**Lightguide**
dual coated, time temperature dependence, 1169
primary coating, thermo-oxidative aging in, 1177
**Lightwave technology**, plastics, editorial, 1157
**Liquid crystalline phase**, behavior of linear polyesters in, 55
**Liquid crystalline prepolymer dope**, organic solvent, PPTA fiber structure and, 765
**Liquid crystalline solutions**, formation of poly(p-phenylene terephthalamide) from, 1237
**Lithography**
bilevel process, using electron beam resist, 920
contrast enhanced process, Chinese Rosin as a binder in, 902
deep UV
epoxy resins for, 907
novel positive resists for, 856
photochemical image enhancement for 0.5 μm g-line, 965
photochemistry and, 882
poly(t-BOC-styrene sulfone)-based chemically amplified resists, 850
half micron, silicon containing photoresists for, 891
KrF excimer laser
deep UV resists for, 859

negative resists for, 868
multilevel, etching rate and profile in, 878

M

**Melt homogeneity,** injection molding, ring-bar device and, 202
**Melting**
analytical model, polymer pellets, 448
polyethylene functionalization in, 1117
single screw extrusion, 258
thermal interactions, oriented polymeric materials, 1503
**Melt solidification,** injection mold filling with, 1039
**Melt temperature,** dependence on screw speed and size, extrusion, 415
**Melt transformation coextrusion,** enhancement of polymeric extrudates, 1004, 1010
**Mesh refinement,** entrance effects for shear-thinning fluids, 488
**Methylmethacrylate-butadiene-styrene modifier,** effects on viscoelastic beta process, poly(vinyl chloride), 817
**α-Methyl styrene/acrylonitrile copolymer,** poly(vinyl chloride) blends, phase behavior, 581
**Mica,** polypropylene filled with, titanate coupling agent effects, 557
**Microcapsules,** preparation of, crosslinking suspension, 1746
**Microelectrometry,** monitoring cure with, composite matrix resin, 290
**Microrheology,** polymer blending, 593
**Microspheres,** preparation of, crosslinking suspension, 1746
**Modulus profiling,** polymer aging insights from, 29
**Mold geometry,** elongational flow injection-molded polyethylene and, 186
**Molecular composites,** rigid-rod, thermoset matrix host for, 107
**Molecular weight**
determination, recent advances, 2
distribution
effects on polyisobutylene, 36
equilibrium, step growth polymerization, 1774
polymer, transient viscoelasticity and, 273
polypropylene and, 390
tetrafluoroethylene-hexafluoropropylene copolymers, 645
**Multi-cavity transfer molding,** flow balancing in, semi-empirical algorithm in, 749
**Mutual diffusion coefficients,** polybutadiene-hydrocarbon systems, 773

N

**Nickel powder blends,** cold compaction, 1446
**Nitrogen,** thermal decomposition of PEEK in, 19
**Novolac resins,** photoresists, combining chemical amplification, 846
**Novolak,** X-ray positive resist, highly sensitive, 874
**Nylon 6**
block copolymers, crystallization of, 493
injection molding of, knit line structure in, 209

O

**Optical cables**
fiber design, temperature dependent materials and, 1186
fire resistant, special plastic coated fibers, 1183
**Optical fiber chemical sensors,** dye-doped silicone polymer claddings and, 1215
**Optical fiber coatings,** low microbending sensitivity, 1172
**Optical fiber connectors,** plastic molded single and ribbon type, 1193
**Optics,** nonlinear, polymer films, 1205
**Optoelectronics,** polymers for, 1209
**Organic peroxide,** sensitization, photoreactive polyimide precursors, 945
**Organosilicon polymers,** photonic applications, 1197

P

**Packaging,** multilayer structures, gas transport in, 639
**Phase behavior studies**
behavior of linear polyesters in, 55
polyarylate/copolyester blends, 85
poly(vinyl chloride), blends with α-methyl styrene/acrylonitrile copolymer, 581
**Phase transition behavior,** miscible polymer blends, 609
**Phenolic triazine,** resins, gelation phenomenon, 1488
**Photocure,** inherently photosensitive polyimides, containing a benzophenone group, 942
**Photoresists**
g-line processes, chemistry of, 928
high temperature stable positive, 955
novel design, based on electrophilic aromatic substitution, 960
novolac-based, combining chemical amplification, 846
poly(methyl methacrylate), photochemical free-volume generation in, 911
silicon containing, half micron lithography, 891
**Poisson's ratio,** polyimide films, 1107
**Poly(2,6-dimethyl-1,4-phenylene ether),** microstructure and ultimate properties, 1298
**Polyalloy,** phase morphology of, mixing history effects, 617
**Polyamic acid,** coatings, solvent removal in, 1611
**Polyamides,** hydroxy, new high temperature stable positive photoresists based on, 955
**Polyamide 12,** morphology of, 679
**Polyarylate,** copolyester blends, as-molded and annealed blends, phase morphology, 1493
**Polyarylate blends,** phase behavior studies, 85
**Poly(aryline imides),** as E-beam resist, sensitivity and resolution, 937
**Polyblend,** phase morphology of, mixing history effects, 617
**Polybutadiene,** blends, miscibility of, 586
**Polybutadiene-hydrocarbon systems,** mutual diffusion coefficients, measurement and correlation, 773
**Polycarbonate**
blends of, physical properties, 244
dynamic mechanical behavior, microstructure effects, 1560
hydrolytic stability, water sorption and, 1733
linear low-density polyethylene blends, orientation and properties of, 1544
thermotropic liquid crystalline polymer blends, deformation history effects, 573
vibration welding, thickness effects in, 1683
vibration-welded to polyetherimide joints, strength and bonding, 1667
**Polycarbonate blends,** liquid crystalline polyester, 600
**Polyester**
linear, thermal and mechanical studies, 55
liquid crystalline, polycarbonate blends, 600
mortar, curing and constitutive relationships, 1629
unsaturated
nonisothermal differential scanning calorimetry of curing kinetics, 1097
monitoring the cure processing properties, 989
**Polyester blends,** control of transesterification in, 1226
**Polyester matrices,** low-profile, structure-property relations, 690
**Polyether block amide blends,** morphology of, 679
**Poly(ether-ether-ketone) (PEEK)**
cold compaction, 1446, 1456
graphite APC-2 composites, ultrasonic welding, 1705
laser annealing of, 1241
nonisothermal crystallization kinetics, 801
oriented, fracture behavior, 405
physical aging effects, 1273
sorption, time and temperature dependent, 1786
thermal decomposition, in nitrogen, 19
**Poly(ether imide)**
joints, polycarbonate vibration-welded to, strength and bonding, 1667
microstructure and ultimate properties, 1298
optical properties of, 1574
**Polyethylene**
basic functionalization, melt, 1117
blow molded bottles, orientation and crystalline morphology, 463
crosslinked
antioxidant diffusion in, 77
service life as high voltage cable insulation, 13
decalin solution, sol-gel transition and crystallization kinetics, 1569
high-density, heated tool butt welding of, 1642
injection-molded, elongational flow, properties of, 186, 193
linear low-density, uniaxial creep behavior, processing effects, 1589
linear low-density, polycarbonate blends, 1544
low-density blends, molecular design of, 538
low-density grades, shear modification effects on rheological behavior, 214
pipe

biaxially oriented, 1638
joining of, dependence of butt fusion bond strength, 1387
strength, pipe butt fusion joints, axial misalignments, 1406
ultrahigh-molecular-weight, cold compaction and sintering of, 564
**Poly(ethylene terephthalate)**
blends of, studies with bisphenol-a-polycarbonate and polypropylene, 1766
crystallization behavior, 1259
film, biaxially stretched, optical properties of, 1534
ternary blends of, chemistry of, 359
**Polyimides**
curing of, 347
films, Poisson's ratio for, 1107
hydroxy, new high temperature stable positive photoresists based on, 955
photoreactive precursors
synthesis and characterization, 950
transparent fluorine-containing, 945
photosensitive, mechanism of photocure of, 942
siloxane modified, synthesis and physical behavior, 1413
**Polyisobutylene,** shear, tack, and peel of, molecular weight distribution effects, 36
**Polyisoimide,** solution viscosity, temperature and shear rate effects, 1221
**Polyketone,** complex formation of some halatopolymers and, 777
**Polymer blends**
microrheology, 593
miscible, intermolecular interactions and phase transition behavior, 609
thermotropic liquid crystalline, polycarbonate and, deformation history effects, 573
**Polymeric fibers,** individually-tested, interrelationships, 1738
**Polymeric solids,** attenuation of, ultrasonic velocity and, 1124
**Polymeric solutions,** through capillaries, slip phenomenon of, 1232
**Polymerization,** step growth, films with bulk in equilibrium, 1774
**Polymerization reactors**
chain, parametric sensitivity, 1246
continuous, adaptive control under periodic operation, 374
**Polymer melt**
cooling of, transfinite element computations, 100
devolatilization, fundamental study, 782
orientation, extensional and shearing strain effects, 984
quality of mix of, monitoring with particulate fillers, fluorescence spectroscopy, 1759
temperature measurements, heating barrel during injection molding, 171
**Polymer networks**
elastomeric latex domain-interpenetrating, 824
polyurethane-polyester, structure-property-processing relations, 397
**Polymers**
adhesive bonding of, 1325
aging insights, modulus profiling data, 29
as electron beam resists, electron sensitivity and chemical structure relations, 353
condensing heat exchanger applications of, 1111
epoxy-based, thermal and chemorheological behavior of thermosets, 973
ethylene, grafting of unsaturated acids and silanes to, 1579
fiber or particle filled, results of swelling in, 268
films, nonlinear optics-orientationally ordered, 1205
gradient-index materials, optical devices and, 1200
impact-modified, fracture toughness, based on *J*-integral, 671
interfaces, welding of, 1340
liquid crystalline
shear and nonisothermal elongational characterization, 625
shear-induced orientation, 1136
mechanical fastening, 1332
metal-filled, critical fill in, 420
molecular weight distribution, transient viscoelasticity and, 273
multiphase, fracture toughness and crack growth mechanism for, 1142
optoelectronics for, 1209
organosilicon, photonic applications, 1197
oriented
crystallization kinetics, 1147
surface structure, topology, and liquid wetting behavior of, 791
thermal interactions, 1503
pellets, analytical melting model for, 448
processing, Banbury mixer, hydrodynamic analysis, 1059
rolltruded, 3-D structure-property relations, 715
silicone claddings, dye-doped, optical fiber chemical sensors utilizing, 1215
solidification and flow, curved square ducts, 91
space and salt water environmental effects, laboratory simulation of, 23
spinodal decomposition, computer vision method for study of, 1426
thermosetting
composite cure reaction, 302
dielectric and dynamic mechanical analysis, 278
particulate-filled, tube flow of, 120
thermotropic fibers, hot drawing effects, 153
viscoelastic response, during impact experiment, 654
yield criterion, pressure-dependent, 769
**Polymer solutions,** primary normal stresses in, 1265
**Polymer systems,** multicomponent, molecular design of, 538
**Poly(methyl methacrylate)**
photoresists, photochemical free-volume generation in, 911
poly(styrene-co-acrylonitrile) blend, physical aging effects, 1604
**Poly(methyl methacrylate co imide),** poly(vinyl chloride) blend, biaxially oriented films from, 1528
**Poly(p-phenylene sulfide) films,** biaxially stretched, crystallinity, orientation, and mechanical properties in, 140
**Poly(p-phenylene terephthalamide),** formation, from liquid crystalline solutions, 1237
**Polypropylene**
degradation, during reactive extrusion, 993
extruded sheets made of, molecular orientation and internal stresses, 163
high density, heated tool butt welding of, 1642
injection-molded discs, layered structure of, 835
mica-filled, titanate coupling agent effects, 557
mineral-filled, impact fracture energy of, 505
molecular weight distribution effects, 390
photography of, high-speed fracture mechanics, 1077
studies, blends of poly(ethylene terephthalate), 1766
ternary blends of, chemistry of, 359
**Polysilanes,** photochemistry, deep UV lithography and, 882
**Polystyrene**
blend, flow effects on miscibility, 1434
fatigue fracture, craze dissemination during, 1592
film, biaxially stretched, structure development of, 1516, 1524
static and dynamic properties of, rubber content effects, 69
**Poly(styrene-co-acrylonitrile),** poly(methyl methacrylate) blend, physical aging effects, 1604
**Poly(t-BOC-styrene sulfone),** chemically amplified resists based on, deep UV lithography, 850
**Polytetrafluoroethylenes,** corrections, 273
**Poly[1-(trimethylsilyl)propyne],** gas permeability properties of, aging effects, 44
**Polyurethane-polyester,** interpenetrating polymer networks, structure-property-processing relations, 397
**Polyurethanes,** segmented, microscopic studies, 113
**Polyvinyl alcohol-copper II complex,** characterization and practical applications, 127
**Poly(vinyl alcohol)s,** acetalized, electron sensitivity of, 353
**Poly(vinyl chloride)**
blends with $\alpha$-methyl styrene/acrylonitrile copolymer, phase behavior, 581
poly(methyl methacrylate co imide) blend, biaxially oriented films from, 1528
viscoelastic beta process in, 817
**Poly(vinyl methyl ether),** blend, flow effects on miscibility, 1434
**Power-law fluid,** temperature-dependent model, between parallel plates, screw extruder, 471
**PPTA fibers,** structure, organic solvent, 765
**Processing**
data acquisition, vibration welding in thermoplastics, 1661
parameters, elongational flow injection-molded polyethylene and, 193

**Propagation paths,** brittle failures, pipe butt fusion joints, 1396

R

**Resin,** phenolic triazine, gelation phenomenon, 1488
**Rheometer,** sliding plate, molten plastics, 499
**Ring-bar device,** melt homogeneity in injection molding, 202
**Rolltrusion,** 3-D mechanical properties and, polymers, 715
**Rotational extrusion process,** studies of polymer extrudates, 1511
**Rubber**
content effects, properties of polystyrene, 69
solid-filled, model for prediction of strength, 1614

S

**Salt water,** environmental effects on polymers, laboratory simulation of, 23
**Screw design,** injection molding, 479
**Shear modification,** rheological behavior and, two low-density polyethylene grades, 214
**Shear rate,** polyisoimide solution viscosity and, 1221
**Shear-thinning fluids,** mesh refinement effects on computation, 488
**Sheet molding compound**
cure analysis, models with substructures, 740
compression-molding flow, 632
molding, complicated geometries, 1051
paste, dynamics of curing, 1286
processing, curing in, 308
**Shrinkage,** thermal interactions, oriented polymeric materials, 1503
**Silanes,** grafting, ethylene polymers, 1579
**Silicon polymer,** application, positive photosensitive material, 887
**Siloxane**
networks, post-cured, properties of, 1419
polyimides modified with, synthesis and physical behavior, 1413
**Sintering,** cold compaction and, ultrahigh-molecular-weight polyethylene, 564
**Slip phenomenon,** polymeric solutions through capillaries, 1232
**Sol-gel transition,** crystallization kinetics, polyethylene/decalin solution, 1569
**Solvent,** removal, polyamic acid coatings, 1611
**Space,** environmental effects on polymers, laboratory simulation of, 23
**Spinodal decomposition,** polymer blends, computer vision method for study of, 1426
**Square ducts,** curved, solidification and flow of polymers in, 91
**Stress**
flow-induced, development in plastic sheet extrusion, 731
residual, molded parts, 441
**Stress-crack resistance,** environmental, processing effects, linear low-density polyethylene, 1589
**Stress field,** calculated, around craze, 426
**Styrene-butadiene copolymers,** blends, miscibility of, 586
**Styrene-butadiene-styrene block copolymers,** microstructural diagnosis, 227, 235
**Swelling**
die wall cooling or heating effects, 685
extrudate
modeling the film blowing process and, 722
results, fiber or particle filled polymers, 268

T

**Tetrafluoroethylene-hexafluoropropylene copolymers,** molecular weight distribution of, 645
**Thermal analysis,** two-dimensional model, resistance welded thermoplastic composites, 1722
**Thermal behavior**
characterization, thermotropic rigid-chain copolymer, 1089
thermosets, model for epoxy-based composites, 973
**Thermosets,** isothermal and temperature programmed kinetic studies, 295
**Thermosetting resins,** chemorheology of, modeling during processing, 1279
**Titanate coupling agents,** effects on mica-filled polypropylene, 557
**Transesterification,** control, polyester blends, 1226
**Transfinite element computations,** cooling of polymer melt via, 100
**Trommsdorff effect,** polymerization reactors exhibiting, parametric sensitivity of, 1246
**Tube flow,** particulate-filled thermosetting polymer, 120

U

**Ultrahigh molecular weight polyethylene gel films,** biaxial stretching of, structure and orientation development, 383
**Ultrasonic velocity**
elastic modulus and, measurement under oscillatory deformation, 1131
polymeric solids, oscillatory deformation and, 1125
**Urethanes,** segmented, microscopic studies, 113

V

**Viscoelastic beta process,** poly(vinyl chloride), methylmethacrylate-butadiene-styrene modifier effects, 817
**Viscoelastic modulus,** advancement of reaction and, epoxy resin, 531
**Viscoelastic response**
during impact experiment, polymers, 654
EPON 828/epoxy adhesives, aging effects, 662
**Vitrification,** during reaction injection molding, epoxy resin, 456

W

**Welding**
butt
heated-tool, parameters of, 1649
heated-tool, scale-up laws, 1642
extrusion process, 1376
hot gas, plastic automobile bumbers, 1368
hot plate, thermoplastics, recent developments, 1382
polymer interfaces, 1340
resistance, thermoplastic composites, two-dimensional thermal analysis of, 1722
spin, new results in, 1655
ultrasonic
PEEK graphite APC-2 composites, 1705
thermoplastics in the far-field, 1699
thermoplastics in the near-field, 1689
vibration
butt welded strength, 1677
polycarbonates, thickness effects, 1683
polycarbonate to polyetherimide joints, 1667
process data acquisition in, 1661

X

**X-ray resist,** novolak-based positive, highly sensitive, 874

Y

**Yield criterion,** pressure-dependent, polymers, 769
